

ADDITION

MADE EASY

Problem 2 out of 3

$$\begin{array}{r}
 254 + \\
 1367 \\
 1208 \\
 23678 \\
 \hline
 \rightarrow \dots 27
 \end{array}$$

Fred,
you need to add
 $2 + 3 + 1 + 6$
and the carry 2
but only type the
righthand digit
of the answer.

STUDENT NOTES

- This program helps you to do addition problems.
- To run this program, type in your first name and press **RETURN** . Type in the **FILENAME** or password of your problems and press **RETURN** . (Your teacher will tell you what it is.)
- You now have a choice of three ways of doing a problem. If you have not used this program before, press **3** and press **RETURN** . By pressing **RETURN** at each step, you can watch the computer show you how to do an addition problem one step at a time. This is called **STEPTHROUGH** mode.
- When you have seen enough, press **R** , press **1** and press **RETURN** . Now type your **FILENAME** , press **RETURN** and start again. You can now do some problems by yourself in **PRACTICE** mode.

- When doing the problems, it is important that you only do one step at a time and then press **RETURN** so that the computer knows you have finished that step.
- If you are not sure what to do at any time, ask the computer for **HELP** by pressing the **H** key. If you still don't know what to do, press the **H** key again and the computer will show you what to do.
- By pressing the **R** key you can:
 1. Start again
 2. Let another student start
 3. End the program
- When you can do the problems well, ask your teacher to give you a **TEST** of the same kind of problems and tell your teacher how you went. (The computer will give you a score at the end of the **TEST**).

HELPFUL POINTERS

 The  key returns you to the menu.

FILENAME The name (or password) of the problems the teacher puts on a disk for you.

 The arrow shows on which line of the problem you are working.

..... The dots show where to put your answer for each step.

 The square shows where the number you type will go.

 The  key gives you **HELP** in **PRACTICE** mode.

 The  key puts you in **STEPTHROUGH** mode allowing you to see how a problem is done.

 The  key must be pressed after every step of your answer.

'Beep' If you hear this sound it means that you have pressed the wrong key. Please try again.
